Abstract

This topic is based on the perspective of Daniel Russell. Dan is a professional researcher who works at Google on a team that built the search engine.

Google has undergone great transformation over the years in organizing their index and drastically refining the results for the people over the years. The three basic skills of Reading, Writing, and Arithmetic were taught to us since school, Dan emphasizes the need for a 4th R called Research. Learning has changed from a school-only activity to a life- long activity. As a person who can learn the best and know the most has a real advantage so as being a great online researcher. People fluent in search can not only save time but also more likely to find higher quality, more credible and useful content.
